Progress Report on Traceability

January – December 2017

www.astra-agro.co.id

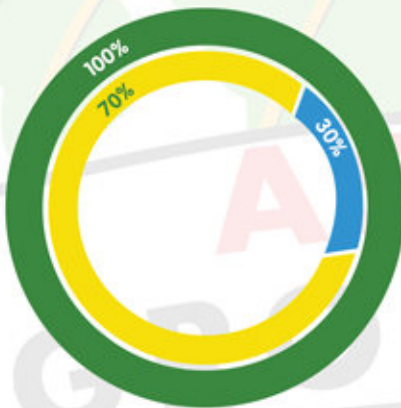

We are committed to building a comprehensive supply chain in accordance with Astra Agro's Sustainability Policies and ensuring that materials supplied from mills and farmers can be trace backed to their plantations of origin.

Traceability to Mill

We have identified and collected information on the suppliers of Crude Palm Oil (CPO) and Palm Kernel Oil (PKO) and have reached 100% traceability to mill for the period of January - December 2017.

Traceability to Plantation

Our materials are obtained (FFB) from nucleus plantations, associated smallholders and independent smallholders. At this present time, we continue to develop traceability concepts and mechanisms to the plantation and farmer levels. This year, to provide preliminary information and obtain input related to traceability, we conduct internal socialization to teams stationed in the plantations.
