Update on Action Plan Development Progress

Astra Agro Lestari is pleased to announce that we will soon be establishing an action plan to follow up on the verification report published by EcoNusantara. During the past two months, AAL team and EcoNusantara team have held several meetings to prepare and finalize the Action Plan. Currently, the Action Plan is in the review stage by the Robertsbridge team to ensure all recommendations made in EcoNusantara's independent assessment of the grievances raised by civil society (Friends of the Earth US and Walhi) have been accommodated in the Action Plan.

We will shortly be sharing the AAL draft action plan with key stakeholders. Stakeholders will be given an opportunity to comment, after which we will publish the action plan in full on our website.
